We stock and can custom order in a variety of wide belts in almost any size, grit and backing combination. If you are in need of wide belts for your sander, don't hesitate to contact us for pricing!

Columbia Tech Tip # 106

When starting your random orbital sander, make sure you start the sander with it placed on your workpiece. If the sander is running when you place it down there is a good chance it will leave deep scratches on the surface that are harder to remove. You can lift the sander off with it running, but don't put it back down unless it has stopped spinning.

Enter for your chance to win a Dynabrade Sander!

(See Dylan for full contest details)

Prices subject to change without notice. Prices do not include applicable taxes.
