APOLLO
HVPL Turbo Spray

Benefits of Apollo HVLP Turbo Spray Systems

- Plug & spray
- Lightweight & portable
- Best transfer efficiency (80%+)
- Huge paint savings (38% savings on coatings when compared with compressed air systems)
- No compressor needed
- Clean, dry air with no inline filters needed
- Versatile fan pattern adjustments
- Variable speed pressure control (Precise control of the turbine pressure output, from 0.1- 9 .0 PSI)
- 32' Apollo-Flex™ Hose
- Handi-Hold™ Spray Gun Docking Station
- Easy cleaning with its own cleaning kit

POWER 5 VS SERIES
Designed for professionals looking for the best performance without breaking the bank

PRECISION 5 PRO LE SERIES
Designed for professionals looking for the best efficiency

“Spray Your Way To The Perfect Finish!”

Columbia Tech Tip # 116:

HVLP paint spray guns can last a very long time with proper care and maintenance. Between coats of the same product, it is fine to leave the coating in the gun for a few hours depending on pot life. When switching colors or the type of coating (e.g., primer to paint), it’s not necessary to completely disassemble, but it is advisable to remove and clean the tips, needles and nozzles to ensure optimal results and longevity of your equipment.
