Price - \$8.04 each

### Columbia Tech Tip # 118:

It's crucial to the quality of your paint job that you get the right ratio of parts in your mix. Make sure you remember to use a strainer when you pour the mix in to your gun. If you're re-using the same cup to mix your paint during the paint job and your wiping it out between coats with lacquer thinner, make sure you don't wipe any on the outside of the cup. It will wipe the ratio charts right off of the cup.
