Columbia Tech Tip # 120:

To use solvent cleaner, immerse spray gun, brush and/or roller directly in the liquid. Allow to soak for 5 to 10 minutes. Remove and let dry with plenty of air circulation. The universal solvent spray is designed to remove fresh paint stains on non-porous surfaces. To use the solvent aerosol to clean and degrease nozzles, place the clogged nozzle on the solvent valve and press down to try to unclog.
