- SUPER FINE – FINISHES (500-600 Scratch/Finish)
- VARIETY PACK – 5 of each (Med, Fine, Very Fine, Super Fine)

#### Columbia Tech Tip # 124:

Start with a coarser grit to remove major imperfections, and gradually move to finer grits for smoothing and finishing. Remember, skipping grits can result in an uneven finish and additional work. The key to successful hand sanding takes patience, attention to detail, and a methodical approach. It might seem like a laborious task, but it's truly where your craftsmanship shines!
